it is smaller.

11. A method for receiving a call having priority by the use of a system for receiving a call having priority in a call regulation according to claim 10, wherein said specific transmission destination telephone number for which a large number of calls are expected beforehand is a ticket reservation destination telephone number.

12. A method for receiving a call having priority by the use of a system for receiving a call having priority in a call regulation according to claim 10, said host device further comprising a time management unit and a timer, said method comprising:

at an approach of the time for which a large number of calls are expected beforehand, by means of said time management unit, notifying in advance a base station of a regulation transmission destination telephone number by affixing it to a signal between a base station and an exchanging center and between an exchanging center and an exchanging center irrespective of a measured value of communication traffic; and

allowing said timer of said host device to operate after notifying a regulation transmission telephone number, and after an elapse of a given time, releasing a call regulation by notifying a base station of a specific pattern indicating regulation release.

13. A program for allowing a computer or a microprocessor to execute a method for receiving a call having priority with use of a system for receiving a call having priority in a call regulation according to claim 7.
